Health & Safety

The authorised signatory agrees to read these health and safety guidelines and ensure that all members in the party understand the importance of safety. Smoke alarms are fitted to ground, first and second floors and are linked. Fire extinguisher and fire blanket can be found in the kitchen. You must only tackle a fire if you feel capable of doing so. The fire service must be called on detecting a fire. Any tampering with the fire safety equipment unless in the event of a real emergency will result in forfeit of all security monies.

The Window on first floor to the rear of the property opens very wide to enable escape in the event of a fire. **All persons must be made aware of the dangers of falling from a window when fully open.** Keep windows closed or on the tilt opening. If you decide to lock windows to help prevent accidents do not hide/lose keys as they are necessary to fully open in the event of a fire.

Please take care when descending stairs, as they are very steep. Use handrail provided. It is good practice to lock the lower stable door when not in use to prevent accidental fall down to lower level.

This list is not exhaustive; you are responsible for your own safety. Please notify owners of any accidents or suggestions for improvement for accident prevention.

I am signing to say I have read and understood the above safety guidelines.
